FOR IMMEDIATE RELEASE

**AUGUST 2011**

## Guardian® Series 2 Complete Series

Process Control has completed the next member of the Guardian® Series 2 family – the 12kg model gravimetric batch blender. This model also introduces the brand new see-through mixing chamber door that allows for an unobstructed view of material in the mixing chamber.

The Guardian® Series 2 line of batch blenders is quickly establishing itself as the premier mixer in the industry. Its unsurpassed accuracy, user-friendly design, and affordable price make it the new standard in the field of auxiliary plastics equipment.

Process Control began shipping Guardian® Series 2 units in October of 2010 and has received a huge spike in demand ever since.

## FEATURES

The all-new design of Guardian® Series 2 provides precise batch-to-batch dispensing and consistent homogenous blending. Standard features include off-the-shelf controls, color touch-screen, removable cartridge V-gate metering, segmented material hoppers, integral drain chute, and a “No Dead Zone” mixing chamber. Guardian® Series 2 may be configured with four-to-twelve ingredient hoppers, with each hopper capable of running 0-100% of the recipe with dispensing accuracy up to +/- 0.02%. Guardian® Series 2 is comprised of four models, including 1.25/2.5kg, 5kg, 12kg, and 18/25kg, with throughput rates to over 10,000PPH.

Established in 1967, PCC has an unending commitment to the design and engineering of advanced auxiliary machinery for the plastics processing industry. Our goal is to provide the most accurate equipment and exceptional customer service. We revolutionized processing with development of Automatic Scrap Recycling for in-line processing of film scrap and the first continuous gravimetric blending system. Process Control continues to lead the industry with advanced design and innovative solutions for the global marketplace.
