FOR IMMEDIATE RELEASE

NOVEMBER 2010

Touch Screen Controller Upgrade for AutoBatch

Atlanta, Georgia, November 2010 - Process Control Corporation has successfully adapted their proven Guardian® Series 2 software and controls to the AutoBatch system. With existing controls at the end of their life, Process Control has developed a new upgrade for their original gravimetric batch blender to uphold its commitment to long-term product support. Now clients who have experienced the precision of the AutoBatch can upgrade their systems with advanced controls that now come standard on all Guardian® Series 2 models. The non-proprietary controller is an off-the-shelf solution that insures ease of use and quick startups. The controls are further simplified with a user-friendly, color touch-screen that provides ease of navigation through the software's many features.

Standard Features

- Off-the-shelf solution with PLC Controls
- Direct drop in panels and cabling
- 5.7" color touch screen interface
- Ability to save configuration to XML
- Remote PC via VNC compatible Ethernet connection
- Can be remote mounted
- Saves and restores configuration data and recipes to USB drive
- Alarm notification via email or SMS text messaging
- Automatic dispense learning when a new recipe is entered
- Standard Ethernet port
- Ability to download settings and log files over a network via FTP connection

Established in 1967, Process Control Corporation has an unending commitment to the design and engineering of advanced auxiliary machinery for the plastics processing industry. Our goal is to provide the most accurate equipment and exceptional customer service. We revolutionized processing with development of Automatic Scrap Recycling for in-line processing of film scrap and the first continuous gravimetric blending system. Process Control continues to lead the industry with advanced design and innovative solutions for the global marketplace. Please visit our website at www.process-control.com.
