### **PCC AT LEISTRITZ SEMINAR 2017**

Process Control continues to impress with its product diversity. PCC's National Sales Manager, Jim Collins, attended the Leistritz Seminar 2017 in Somerville, NJ. This well attended event focused on the various applications and design processes for twin screw extrusion, with emphasis on thermoplastic processing using twin screw extruders. This two day seminar features both lecture and hands on workshops providing experience running a twin screw. PCC has been actively supplying high output, starve fed continuous blenders for twin screw extrusion applications for many years (see below).

*In 2017 Process Control celebrates 50 years of supplying equipment to the plastics industry.*

Established in 1967, PCC's goal is to provide the most accurate processing equipment and exceptional customer service and spare parts support. Process Control continues to lead the industry with advanced design and innovative solutions for the global marketplace.
