FOR IMMEDIATE RELEASE

FEBRUARY 2017

PROCESS CONTROL CORPORATION

Product Spotlight: XU Series 2 Continuous Gravimetric Powder Blender

Today's blog entry will feature Process Control's X2U Series Continuous Gravimetric Powder Blender. The X2U offers unsurpassed blend accuracy and blend homogeneity in a wide range of configurations to meet the needs of any application incorporating the [PF Series powder feeders](#). It allows gravimetric blending of non-free-flowing powder materials with free-flowing powder and pellet materials at unprecedented metering and mixing accuracy.

Shown in picture above, a configuration with an extended hopper. [Follow the link](#)

The powder feeders allow rates as low as 0.2PPH and as high as 3,000PPH. Metering augers are available in full pitch or 1/2 pitch configurations with helix diameters from 1/4 inch to 2-1/4 inches.

Incorporated into the electro-polished stainless steel design is a patented round-to-trough feeding area which provides more consistent mass flow for better metering accuracy. The feeder is designed with a steep wall, removable hopper which features a dust-tight band clamp for easy mounting of hopper extensions and quick disassembly for clean out. The bottom trough design is optimized to provide maximum material exposure to the auger.

In future blogs, we will feature our complete [Continuous Blender Powder System](#).

For more information on the X2U, please [visit our website](#) or [download the spec sheet](#). Be sure to also check out Process Control's [PF series powder feeders](#).

Established in 1967, Process Control Corporation has an unending commitment to the design and engineering of advanced auxiliary machinery for the plastics processing industry. Our goal is to provide the most accurate equipment and exceptional customer service. We revolutionized processing with development of Automatic Scrap Recycling for in-line processing of film scrap and the first continuous gravimetric blending system. Process Control continues to lead the industry with advanced design and innovative solutions for the global marketplace. Please visit our website at www.process-control.com.
